BUSINESS INTELLIGENCE & ANALYTICS REPORT

Retail Sales Performance & Analytics Dashboard

Author: Anurag Kumar Poddar **Tool:** Looker Studio & Data Analytics **Domain:** Retail Footwear & Apparel

Executive Summary & Objective

The primary objective of this project was to transform raw retail sales transaction data into an interactive, highly visual business intelligence dashboard using **Looker Studio**. By centralising operational and commercial metrics, the dashboard enables stakeholders to evaluate nationwide sales figures, evaluate regional and state-level market penetration, track category demand, and monitor monthly turnover to guide strategic decision-making.

Interactive Dashboard Architecture

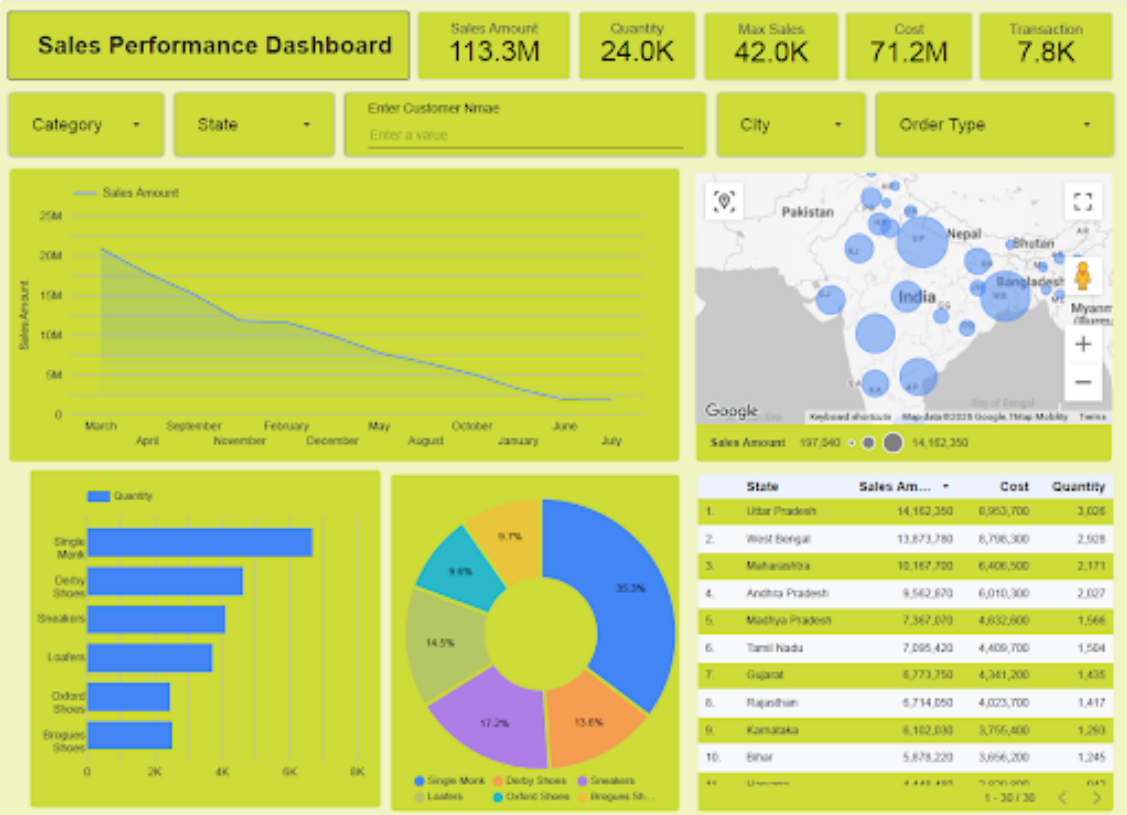

Figure 1: Full interactive Looker Studio dashboard featuring KPI tiles, trend timelines, geographical concentration, volume rankings, and regional contribution tables.

Core Metrics & Performance Indicators

The underlying dataset captures **7.8K transactions** spanning retail locations across India, yielding the following high-level benchmarks:

KPI Indicator	Observed Value	Business Context & Description
Total Sales Amount	**113.3M**	Gross sales volume generated across all product categories and territories.
Total Operational Cost	**71.2M**	Associated product and fulfillment expenditure (gross margin of ~37.1%).
Units Sold (Quantity)	**24.0K**	Total volume of pairs and units distributed across all customer orders.
Total Transactions	**7.8K**	Completed order lines and invoices recorded in the dataset.
Peak Order Value (Max Sales)	**42.0K**	Highest single transaction value recorded within the store logs.

Product Category Dynamics

- **Single Monk:** Market leader accounting for **35.3%** total share and leading unit sales volume (~6.7K units).
- **Sneakers:** Second largest segment by share (**17.2%**), indicating strong casual footwear demand.
- **Loafers & Derby Shoes:** Steady mid-tier contributors with 14.5% and 13.6% shares, respectively.
- **Brogues & Oxford Shoes:** Classic styles together capturing ~19.3% market share (~2.5K units each).

Regional & Trend Highlights

- **Top State (Uttar Pradesh):** Ranked #1 generating **14.16M** in revenue and 3,026 units sold.
- **Close Second (West Bengal):** Produced **13.87M** in sales across 2,928 total units.
- **Western Markets:** Maharashtra generated **10.17M**, followed by Andhra Pradesh (9.56M).
- **Seasonality:** March registered record high performance (~21M), showing tapering trends towards mid-year months.

Analytical Takeaway & Strategic Decision Support: The dashboard integrates dynamic filters (Customer Name, Category, State, City, Order Type) allowing commercial teams to cross-filter instantly. By identifying high-margin territories like Uttar Pradesh and high-volume styles like Single Monk, leadership can optimize replenishment, tailor regional promotions, and manage inventory risks effectively.
